

# HORWICH

## About Horwich SK

Established in 1988, Horwich Sewing SK started life as an industrial garment manufacturer offering a wide range of options from CMT to fully factored garments. Since its inception, the Horwich name has become synonymous with quality, honesty and integrity. Deep rooted into our values is the need to provide honest communication and delivery on time, every time.

Providing fully factored services which can include sourcing the material and creating the whole garment. Alternatively, the CMT (cut, make and trim) approach to manufacturing may be utilised, where materials must be provided.

Our modular manufacturing systems enable us to offer flexibility and quick response to demand so that we can develop the perfect production solution for your needs. We operate quick response factories in Slovakia and satellite factories in Macedonia with a 30,000+ garment capacity.

Utilising our in-house expert team allows us to personally ensure the quality of the garments you receive. We have a proven track record with Blue Chip companies and all our products are manufactured under ISO 9001 and Modular D specifications.

- 7 Partner factories
- Solution Flexability
- 99.1% on-time delivery rate
- Capacity 30,000+ garments per week
- Flexability through Modular D
- ISO

## **CRAFTER, A HORWICH SK COMPANY**

Crafter Collection was born in 2020 from the values of its parent company Horwich SK.

**'To create truly fit for purpose garments, of the highest quality and provide them at a great price.'**

The initial Crafter mission was generated out of necessity to provide a quality collection of key pieces that are comfortable to wear for the entire day, great fitting and can survive the everyday demands of industry professionals. The launch of Crafter Collection with a focus on women's workwear came as a result of research, and ultimately discovering a true gap in the market. We found that there was a real lack of great women's workwear that not only fits well but is highly durable.

In the search for innovative fabrics that provide both durability and stretch, Crafter Collection discovered CORDURA®; renowned as an innovative leader in producing advanced fabrics, known for their strength and durability. The first collection is crafted with a CORDURA® NYCO fabric enhanced with MoveX® stretch technology created by Sapphire Mills.

# WORKWEAR THAT ALLOWS YOU TO MOVE, WITHOUT RESTRICTION.

We work with the best producers, creating new innovative fabrics. We engineer our products for your needs, making your toughest days a little easier. Our products are fit for purpose, rugged and ready to meet the challenges of your working life. Using CORDURA® NYCO and MoveX® combined with the highest quality controls, our products are built to last. We look after the garment detail so you can get on with your job in comfort.

## FIT MATTERS

Gone are the days of trying to fit into workwear that ultimately makes you feel less than your best self. Combining fabric technology and fit we have the solution. Your best fit is here!

**TROUSER SIZES 6-24**

**GILET SIZES XS-XXXL**

A pair of dark-colored work trousers is shown against a black background. A hammer with a blue handle and a silver head is tucked into one of the side pockets. The trousers have multiple pockets and a small logo on the left thigh.

## POCKETS, ON POCKETS, ON POCKETS.

Having pockets is an essential part of the design when it comes to practical workwear. We have them in all the right places and for carrying all your equipment on the move. Our pockets are engineered to suit the shape of the garment and the wearer. We have tested them and made them robust and strong in all the right places. Using CORDURA® NYCO fabric, heavy poly/cotton pocketing and reinforced stitching, these pockets are made to last.

## RESISTS THE ELEMENTS

Crafter products are not only designed to provide the best in workwear comfort but are also built to shelter you from the harsh environments and elements work can throw at you. Our first collection uses MoveX technology by Sapphire Mills which is both water and stain resistant. The Tool trouser and Multi pocket Gilet have added CORDURA® reinforcement fabric on major stress points – such as knees, pockets and ankles to provide that extra protection from the elements.

A close-up photograph of a dark, textured surface, likely a shoe sole or workwear material. The surface is covered with numerous small, light-colored water droplets and some dark debris, suggesting a wet and rugged environment.

## WORKWEAR THAT PUTS THE MILES IN.

Buy better, buy less. By choosing Crafter Collection you're making a sustainable choice. The fabric in our garments is performance enhanced and made to last 3 times longer than a regular poly/cotton twill fabric. Our fabrics are lab tested to withstand the wear and tear of your busy lifestyle. Our promise is to protect with confidence.

**3X MORE DURABLE THAN 100% COTTON GARMENTS**

## WORKWEAR TROUSER

Durable and stretch thanks to the breathable fabric that has cotton, stretch and is CORDURA® NYCO Certified

Water and stain resistant

Lightweight yet durable
